

USES OF AIR

- All living things breathe in and breathe out air to live.
- Air is helpful in breathing, blowing, drying, flying, filling, and sailing.
- The air in the atmosphere is made of 78% nitrogen and 21% oxygen.
- Sound travels through air and helps us hear different sounds.
- I will plant trees and help to make the air clean and fresh.

Look at the pictures and name the activities. Take help from the word box.
