

TINY CREATURES THE INSECTS

CRAWLING / CREEPING INSECTS

Snail

Caterpillar

Worm

Bed bug

Mite

Ant

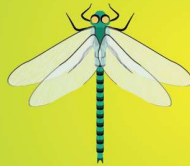

FLYING INSECTS

Honeybee

Butterfly

Dragonfly

Mosquito

Cockroach

Grasshopper

HELPFUL INSECTS

Silkworm

Earthworm

Honeybee

 Insects are small animals. Most of the Insects have six legs and one or two pairs of wings. Insects live in plants, web, hole, grass, hive and the soil.

 Some Insects have a pair of antennae on top of their head.

 Insects can be harmful because some can sting, bite or even spread diseases.

 Some insects are helpful to the humans and they give us honey, silk, beewax and dyes.

 I work tirelessly like an Ant.
